About This Content

Five places to fly for peace, quiet and plenty of bracing North Sea air.

These five airports on the islands of Baltrum, Borkum, Juist, Langeoog and Norderney are all part of the East Frisian Islands, situated off the coasts of Germany and Holland.

Borkum is the largest of the islands, located just 30 kilometres from the mainland, and is Germany's most north-westerly point. Although an island for Whalers and Pirates in the past, it is now part of a National Park, as indeed are all the islands, and is an unspoilt place to escape to. The island's airport is just one metre above sea level and has one asphalt runway exactly one kilometre long. It also has two grass runways just short of a kilometre each.

Baltrum is known as the sleeping beauty of the North Sea and is the smallest of the islands, whereas Juist is the longest at 17 kilometres and is only seven kilometres from the mainland.

Norderley has special UNESCO World Heritage Status and Langeoog makes up the fifth island. Each of these islands boasts its own airport, ideal for island hopping with 20 combinations for different take-off and landing places.

Features

-
- High-res ground polygon
 - Photo-real layout and textures (25cm resolution)
 - Hand placed hi-resolution buildings within airport boundaries
 - Custom auto-gen buildings outside the airport boundary
 - Extensive library of airport clutter
 - Accurate taxiway lanes
 - Custom made static aircraft
 - Custom night-lighting
 - Compatible with Default and Orbx Global

Title: FSX: Steam Edition - East Frisian Islands Add-On

Genre: Simulation

Developer:

SIM720

Publisher:

Dovetail Games - Flight

Release Date: 21 Jul, 2015

a09c17d780

English

This game is actually quite a bit of fun, and at a little over 5 bucks it's not a big risk if you find out you don't enjoy it. There are some things to note; like obviously you need a VR headset to work as without it you're not going to be able to do anything, there are some minor bugs (like sometimes debris will remain on the screen longer than they're supposed to, but it's more of a niggle than an actual annoyance.), and some people might find this repetitive, but those people probably don't have souls so it doesn't really matter.

I love the beginning of the game; you're in this cool little room with a bunch of displays and it really feels like you're there, the scaling of that first room is done really well! Also, I like that you can just hop on it and there isn't a huge cutscene waiting for you, you can just immediately PLAY! I know that tends to annoy me, especially when game studios remove the ability to skip cutscenes - grr! So yay, thankfully I don't even have to deal with that with this little game. There is an optional tutorial which I strongly suggest everyone goes through at least once, it will help you get your bearings and understand what you're supposed to do! However, if you're one of those "I don't need no dang tutorial--I'm a rebel!" sorts then remember, the tutorial is optional and you can just jump in and figure things out on your own if you so choose to. (Honestly though, just do the tutorial, it's short and pretty helpful.)

Next the actual play-experience! It's pretty surreal, you're basically floating in space, surrounded by all kinds of debris floating around you, and it's your job to destroy as much debris as you possibly can. There's asteroids, aliens, lasers, boss fights, and things you can collect from the debris to up the ante on your laser; more destructive power? Yes, please.

Lastly, the difficulty will always keep increasing to keep you on your toes. So there will be more enemies, more lasers threatening to destroy you, and more boss fights as you continue on within the game. I was surprised by how much I actually enjoyed this, but enjoy it I did!

Something very important to keep in mind; you're literally in the middle of all this debris which means some of it will be super close to your personal space, the natural inclination is to move away... so keep away of where you are moving within your PLAY AREA, because it is easy to lose yourself in the game and start moving away from your designated play zone and start knocking yourself and your VR gear into the walls.

TL:DR - It's like stepping into those old arcade games, but now you're IN it, surrounded by it. It's fun, simple, and at 5.99 pretty dang affordable. Definitely recommended

. I got the Soul Gambler: Artbook & Soundtrack as part of the \u201cSoul Gambler: Dark Arts Edition\u201d pack during the 2015 Steam Summer Sale. For the highly discounted price, it\u2019s indeed a nice and fair bundle.

It contains 36 tracks in MP3 format and some of them can be relaxing when using as background noise while you are doing other side activities like cleaning your space or something similar.

It also includes one wallpaper in 6 different resolutions and one Artbook with 76 pages containing the art of the game, the cast, the different locations and the different environments as well. If you like having some digital goodies like the soundtrack of a game and some art books I can recommend grabbing the bundle I mentioned, especially if you can purchase with a deep discount like I did.

. I absolutely LOVE this game!!! So much fun. Easily the best turn based strategy game I have ever played :). Horrible servers, very lacking in content, physics for some reason feel worse than the first game

Honestly if you like the crew go back to playing the first game its still much better than this pile of a disappointment... I must say I am quite disappointed with the company behind Strange Brigade. I purchased three copies of the game. One for myself and two for a friend and her fianc\u00e9. My laptop is a few years old but her fianc\u00e9\u2019s is brand new. Neither he or I could get the game to work on our systems. I emailed Support asking for help. I got \u2018Tommy\u2019 whose first initial response was asking for more information about my system and my friend\u2019s fianc\u00e9e.

I provided it. Then waited weeks. And waited. Finally he responded with \u201cGet a new graphics card.\u201d I wrote back that I doubt that this is the kind of answer most people would want and could he please review the specs as the game should work based on the minimum requirements - that it might be something else.

He responded \u201cTake the advice or not\u201d. That was it. A literal \u201chey stop wasting my time and go screw

yourself. Most professional businesses would respond with something like "I'm sorry but the issue does seem to be your specs as far as I can tell. I think an upgrade would help but if not please consider our games in the future when you can get a new graphics card." Nope. Just an unhelpful and rude tech support rep.

I'll be returning the game copies and filing a complaint. I understand in this day and age we get people cutting us off in traffic, flipping us off, rude crass people in line while waiting. I'm guessing Tommy has cost his company a number of sales. And if the other reps act the same way I'm sure even more revenue has been lost. Some might feel I'm overreacting. Personally I think Steam should read and react consider how many of their customers have publicly stated they are not getting help despite making hundreds of comments on the forums asking for help. It's their reputation that is being damaged too.. No surprises here with "Fantasy Mosaics 18: Explore New Colors." It plays exactly like the previous games in the series. My only minor gripe is that just like the previous game, one of the puzzles in the last set requires guessing (can't get enough points to activate the "power-up" tools to get a hint). Other than that one case, everything was great. Oddly, I got about two fewer hours of game play than normal (10.5 hours instead of my usual 12-ish hours). But, it's still worth buying even at its current list price of almost \$7 (plus, I bought the "Mega Pack" bundle on sale -- so it was definitely worth it to me).. 11/10 Great game to play with friends! I love the zombie mode.

Entertaining for a bit, but there are too many games out there and this one loses its charm after awhile. I am not a puzzle game freak so it could be me. I would give this a neutral review.

The ice man that provides PSAs looks drunk and seems to have a black eye.. I bought it only to support the devs. I really enjoyed my time with this game.. Tons of wheel options now! Something for everyone!. I played for about 30 minutes of this game and wow it is really bad compared to AC3 and other AC games such as 4, Revelations, rogue, syndicate, and freedom cry. I looked into it about where it would be related to history wise and other things about the game such as what it was initially made for to be played on. That is the play station Vita (a little hand held thing like the DS or psp) Anyways now I see why it looks poorly made but practically is like a dlc.

Since I have played so little I don't know if you play along side Connor but the play style of attack is just like his. The beginning of the story is really poorly made though. If you don't know anything about the main character you basically start off as some random little girl who chases a chicken, loses her mother and then gets hit in the back by some guard. Next thing you know you are a full grown woman who knows how to fight and fights off the guard and some other guys, But THEN you wake up as though that whole thing was a dream. So really bad introduction of the character, not much backstory but that she lost her mom, doesn't show how she has hidden blades or how she got assassin gear (robes).

Moving onto the story/ gameplay, Plays just like AC3, auto jumping from an edge of a roof to another, targeting enemies is the same. The sad part is the minimap has little detail, the world you start in is super small, there are 3 personas which I haven't seen in any of the other AC games, the markers for guiding you are really close, like you run 5 steps for each checkpoint.

To me it's for little kids, and like people who need a lot of help just playing this game. Like handicap gamers. This game was not made for PC at all. It would work for consoles such as Xbox, or PlayStation but isn't made for anything more than the PlayStation Vita.. I recommend the game to everyone that is somewhat familiar with Esports, there is a lot of action and humor around it. I had a lot of fun while playing through the game. It has a story filled with humor, the gameplay is full of action, especially during championships and I laughed my ass off during the cutscenes. The game is said to be partially translated into other languages and as a Russian speaker and experienced gamer I found the gameplay to be very intuitive and easy to understand.

Totally a must have for those who don't take jokes too seriously. 10/10!

Looking forward collecting steam cards!. I expected something Lemmings style. The mechanics is quite different, but equally funny.

On the only bad thing is on my Ubuntu 14.04.4 it destabilizes steam (I saved Dodos, but eventually I had to "kill -9" steam). The game is very much like Supreme Commander however with much more simplified graphics and sound. It has potential but the game is let down with punishing set ups and terrible lobby systems. Be prepared to manually download game modes and specific versions of each of them and manually placing them in the game. This is very off putting and this put me and my friends off playing it. The game also suffers from the lack of explaining on how to use the lobby system and even how to play the game, it shoves you in expecting you to know everything about it.

Pros:

Decent gameplay

In depth

Has potential

Works well on low end systems

Cons:

Painful to set up

Lobbies are designed poorly

Time consuming to play

Nothing is explained on how to play or use the lobby system

This game is recommended to those who like RTS games and have a lot of patience, especially if you like Supreme Commander.. If you're looking to play alone in an empty casino, this game is for you! In all seriousness, Four Kings Casino is an interesting title that is very similar to the PS Home Casino. The developers are really nice and interactive. Slot and table games are very fun and fast. Why am I not recommending this game then? Here's why:

BJ and roulette completely lack excitement since the betting limit is under 0.5% of your start money. It's really hard to play poker when there's barely anyone online to play with and when there is they won't want to play with you. There's a VIP area which requires you to play approx. 30h/month to gain and maintain your VIP membership unless if you pay for it.

This game needs a lot of work still before it's ready for a release. For now: **DON'T BUY THIS GAME!** Play at a real online casino! Obviously the lack of players isn't the developers fault but there are many issues that they should fix.

TL;DR: Nobody is online, betting limits are **WAY TOO** low. Don't buy this game unless you're dying for a casino game on Steam.. **THEN THE WINGED HUSSARS ARRIVED!**
